

Recognize fake bearings in seconds

Fake bearings are a threat to the safety of both people and equipment. The “Stop Fake Bearings” initiative of the World Bearing Association (WBA) helps you recognize fake bearings, protecting your employees, your equipment and your reputation.

Download our app now:

How does it work?

The QR codes take you to the App Stores where you can download the WBA app at no cost. Activate the app, and scan the code on the bearing's packaging. You'll get a response from the app immediately showing one of these icons:

Valid:

the code is correct and is contained in the manufacturer's database.

Caution:

the code is known but has been scanned numerous times. To be on the safe side, follow the manufacturer's recommendation in the response.

Warning:

is an unknown code. The bearing is a suspected fake and must not be used under any circumstances without confirmation from the manufacturer. Follow the manufacturer's recommendation in the response.

No code on the product?

This is an older product or doesn't have a code yet. Contact the manufacturer if you have any doubts about the product's authenticity.

Remember:

Only buy your bearings from trusted sources!
